3. SCOPE OF WORK

3.1 Introduction

The GPF entered into a three-year contract for the development and maintenance of both Loan Application System (LAS) and Loan Management System (LMS) which expires in December 2024. Both systems require ongoing maintenance and support and may also need future development and enhancements as required by GPF's evolving business needs, changing products/services, policy changes, or new legislative requirements.

The Gauteng Partnership Fund (GPF) is currently searching for a partner to provide full support and management of the Loan Application System (LAS) and/or Loan management support . **The service provider can tender for either both systems or any one of the 2 systems.**

3.1.1 Loan Application System

The Loan Application System (LAS) was custom developed to create a digital platform for managing the entire loan process from application to disbursement for the GPF. The LAS is designed to accommodate a variety of roles within the organization, with at least 10 internal users. It allows external customers to apply for funding for various GPF products through the GPF website, enabling seamless interaction between GPF staff and external customers.

The system was developed using the following configuration:

3.1.1.1 Technical system configuration details

System Configuration: The system is hosted on Microsoft Azure

Framework: Laravel Framework 8.83.1

Programming Language: PHP V8.1.2

Database: MySQL - version 8.0.35 - (AWS Remote Desktop Session)

3.1.2 Loan Management System

It is a cloud-based solution that handles the entire lifecycle of a loan, from origination to repayment. It manages payments, calculates interest, and tracks balances, interest earned, and principal paid. LMS also provides communication tools for lenders and borrowers, offers reporting and analytics on loan status, portfolio risk, and performance metrics, ensures compliance with regulations, and aids in debt collection when borrowers become unresponsive.

Margil Loan Management System is an off-the-shelf system . Bidders must partner with the Original Equipment Manufacturer (OEM) as the OEM is the only one that can do development. Therefore, there is no functional evaluation criteria for LMS

3.1.2.1 Technical system configuration

Platform: off the shelf - Margill loan manager

OEM website: [Margill | Loan Servicing Software Solution](#)

3.2 Additional support services expectations

The partner is expected to provide comprehensive LAS and LMS services, including but not limited to the following services :

- Aligning the system with GPF's backup policies for daily, weekly, monthly, and yearly operations
- Carrying out restores for business continuity
- Managing system updates and patches
- Performing system administration tasks such as adding, deleting, and segregating users on the system
- Upgrading the system to ensure compliance with security patches
- Ensuring sufficient server resources for the efficient operation of the application
- Handling all system administration tasks related on both systems
- Ability to further develop additional functionality on the system, and so on

3.3 Experience and Skills set requirement to support the LAS environment

To support the LAS environment, it is expected that the service provider will possess a diverse skill set.

The following skill sets are amongst the critical skills that GPF has identified as being crucial for maintaining and

supporting the LAS system. The resource who possesses these skills must also have a minimum of three 3 years' working experience.

This criterion is also a part of the evaluation process.

- **Full-stack Developer**, efficient in working on cloud-based platforms, building and maintaining both the front-end and the back-end of a website, specializing in different technologies and programming languages which include SQL, Laravel Framework 8.83.1, PHP V8.1.2 language
- **Business Analysis Skills**- with experience in the areas of business architecture analysis, problem identification, solution design, and process documentation to increase efficiency and strengthen business processes.
- **Cloud System Support Engineer** - proficiency in tools for VM management and orchestration, like VMware vCenter, Microsoft System Center, Virtual Machine Manager, or cloud management platforms (e.g. AWS Management Console, Azure Portal)

Please note that the GPF is aware that, in some instances, the LMS and LAS functionality are integrated into a single system. Therefore, reference letters required on functional criteria for LAS services will also consider LMS experience.

3.4 Description of the RFP

Proposals are being sought from reputable and experienced bidders to provide the following services for three (3) years:

- **Support and Maintenance of the Loan Management System (LMS) and Loan Application System (LAS)**
 - Providing Application Maintenance including but not limited to error/bug fixes, additions/modifications to the software to cater to changes to data sources, and/or new reporting requirements.
